DETAILED ACTION

1. Claims 1-19 are pending in the present application.

Drawings

2. The drawings are objected to because descriptive textual labels are needed in figures 2A-2C, 3A-3C, 4 and 5. For example figure 3A depicts reference 304-4, this element should be labeled member see page 6 lines 26-32. This will give the viewer clear understanding of the drawings without having to refer to the detailed description. Also, figure 2A depicts partial views. Note elements 201-3 and 201-3 are not shown as connected to reference character 200. Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the

applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding independent claims 1, 8 and 15 the limitation "In a circular, singly linked list" in the preamble of the claim is vague. The grammatical use of a comma after the limitation "circular" confuses the claim language interpretation; note the detailed description describes the element "circular singly linked list". Linked lists can take to forms circular singly lists and circular doubly linked lists. The claim as presently presented does not claim a data structure and is vague. The examiner suggests deleting the comma. The limitations of independent claims 8 and 15 parallel claim 1; therefore they are rejected under the same rationale. Claims 2-7, 9-14 and 16-19 are rejected based on dependency.

Claims 3, 10 and 17 recite the limitation "the list scan operation" ; there is insufficient antecedent basis for this limitation in the claim.

Allowable Subject Matter

5. Claims 1-19 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
